

Zona Time Tracker — iPhone Setup Guide

For: Employees using the mobile app

Device: iPhone (iOS 16 or newer recommended)

Step 1: Open the App

On your iPhone, open **Safari** (the default browser — not Chrome or Firefox).

Go to:

<https://dev-time.zonaproperties.ae>

You must use Safari to install the app to your Home Screen.

Step 2: Log In

Enter your **email address** and **password**, then tap **Sign In**.

Step 3: Install as PWA (Add to Home Screen)

Once logged in, tap the **Share** button at the bottom of Safari — it looks like a box with an arrow pointing up ↑.

[Screenshot Placeholder — Safari share button]

Scroll down in the menu that appears and tap **"Add to Home Screen"**.

[Screenshot Placeholder — Add to Home Screen option]

A name will be suggested automatically. You can change it or leave it as **Zona Time**. Tap **Add** in the top right corner.

Step 4: Launch from Home Screen

Go to your iPhone Home Screen. You will see the **Zona Time** icon.

[Screenshot Placeholder — Home Screen icon]

Tap the icon to open the app. It will open in full screen, just like a native app — no browser bar.

After installing, always launch the app from the Home Screen icon, not from Safari.

Step 5: Using the App

Once inside the app, you will see:

- **Check In** — tap to start a session on a project
- **Check Out** — tap to end your current session
- **My Time** — view your time entries
- **Extras** — submit extra work or own cost items
- **Mileage** — record kilometres driven

Troubleshooting

Problem	Solution
App not loading	Check your internet connection and try again
Cannot find "Add to Home Screen"	Make sure you are using Safari, not Chrome or Firefox
Login fails	Check your email and password, or use "Forgot password?"
GPS not working	When prompted, allow the app to access your location
App looks blank after opening	Pull down to refresh, or delete the icon and re-install
Session already active	Log out and log back in to reset

If the problem continues, contact your manager or system administrator.
