

Zona Time Tracker — Quick Start Guide

Version: Sprint 5.3 (June 2026)
Audience: All users — Admin, Manager, Employee

1. Login

Open your browser and go to:

https://dev-time.zonaproperties.ae

Enter your email address and password, then click **Sign In**.

If you forgot your password, click **Forgot password?** on the login screen and follow the instructions sent to your email.

2. Dashboard (Admin / Manager)

After logging in as Admin or Manager, you land on the **Operations Dashboard**.
It shows a live overview of today's activity:

Section	What it shows
Today at a Glance	Active now · Checked out today · No activity · Hours logged · Open extras
Alerts	Sessions over 10 hours · Previous-day open sessions · No-activity employees
Live Check-ins	Who is currently checked in, on which project, since when
Today by Project	Project-level breakdown of active and completed sessions
Employee Status	Each employee's status (Checked In / Checked Out / No Activity)
Open Extras	Pending extras awaiting review

The dashboard refreshes automatically every 30 seconds. Use the **Refresh** button to update immediately.

3. Employees

Navigate to **Employees** from the top menu.

- View all employees: name, employee number, role, status, team
- Search by name or employee number
- Filter by role, team, or status
- Open an employee record to view details, edit information, manage assignments

Employee statuses:

- **Active** — can log in and use the system
 - **Pending** — invitation sent, not yet accepted
 - **Inactive** — account disabled
-

4. Projects

Navigate to **Projects** from the top menu.

- View all projects: name, code, client, status
 - Create a new project: name, code, client, location, start date
 - Assign employees to a project (restricted access) or leave open (all employees can access)
 - Projects with status **Active** appear in the employee check-in selector
-

5. Time Entries

Navigate to **Time Entries** from the top menu.

View and filter all time entries across the organisation:

- Filter by employee, project, date range, or entry source
 - See check-in and check-out times, GPS status, duration
 - Review manual entries (entered retrospectively by admin)
 - Download entries as Excel
-

6. Extras

Navigate to **Extras** from the top menu.

Extras are non-time items submitted by employees for approval:

- **Extra Work** — additional work hours outside the project scope
- **Own Cost** — personal expenses to be reimbursed

Each extra has a status: **Open** (awaiting review) or **Closed** (processed).

7. Mileage

Navigate to **Mileage** from the top menu.

Employees submit mileage records (distance driven for work). Admins can view all mileage, filter by employee or week, and export.

8. Roles Explained

Role	What they can do
Admin	Full access — employees, projects, time entries, extras, mileage, dashboard, settings
Manager	Restricted view — sees only employees and projects assigned to their team(s)
Employee	Mobile-only access — check in/out, add extras and mileage, view their own time

9. What is implemented today

-  Login / logout / password reset
-  Operations Dashboard (live check-ins, alerts, project breakdown, employee status)
-  Employee management (create, edit, invite, deactivate, reactivate)
-  Project management (create, edit, assign employees, deactivate)
-  Time entries (view, filter, export Excel)
-  Check In / Check Out (employee mobile app with GPS)
-  Extras (submit, view, close)
-  Mileage (submit, view, export)
-  PWA install (add to iPhone Home Screen)
-  Role-based access (Admin, Manager, Employee)
-  Audit trail (all changes logged)
-  Automatic unclosed-session detection

10. What is NOT implemented yet

-  Email notifications (password reset emails require email service configuration)
-  Manager team assignment UI (currently set via database)
-  Client management screen
-  Reporting & billing export

-  Payroll integration
 -  Approval workflow for extras
 -  Multi-language support
 -  Offline mode for mobile (requires PWA background sync)
-

For questions, contact your system administrator.
